The SERA2 Program is utilizing the Centers for Disease Control and Prevention's (CDC) Social Vulnerability Index (SVI) which evaluates 15 social factors grouped by socioeconomic status, household composition and disability, minority status and language, and housing type and transportation to calculate the social vulnerability score to identify communities disproportionately impacted by COVID-19.
"I really appreciate your kind assistance from the bottom of my heart. Without your help, I would have had to wait for a long time. This check [will] recover the lost rent, over [a] month of unpaid rent. We are very happy thanks to your kind help I don't know how to thank you enough." -Fred (Landlord)
